ATTN: Air Quality Division

RE: 15-Day Pre Permit Construction Approval Application

Dear DEQ,

We are proposing to construct an anaerobic digester on Dry Creek Dairy that will collect the biogas from the cow manure and transform it into renewable energy through the use of three reciprocating engines and generators. A letter from Kleinfelder is included in the application demonstrating that he has performed the screening level modeling and found that the proposed emissions will not cause or significantly contribute to a violation of any air quality standards. A copy of the approved modeling protocol and a copy of the public notice meeting is also attached. Please review the attached application for the pre-permit construction approval and let us know if you have any questions.

Based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.

Sincerely,

Kyle Juergens

REMARKS

Attached is a 15-day pre-permit construction/permit to construct application for an air permit for an anaerobic digester in Hansen, ID. We have a public informational meeting scheduled for 12/11/07 in Hansen. A copy of the published public noticed is included in the application. If you have any questions please feel free to call me at 360-366-9900 or kylej@andgar.com.

Sincerely,

Kyle Juergens

2. PROCESS DESCRIPTION

Andgar Corporation proposes to construct and anaerobic digester renewable energy system on Dry Creek Dairy in Hansen, Idaho. The manure from the dairy will be pumped into the anaerobic digester where the naturally occurring process of digestion will result in the production of methane. The anaerobic digester assists in the collection of the methane rather than allowing it to escape into the atmosphere. The methane will be piped to an adjacent building where it will be utilized in three reciprocating internal combustion engines to produce renewable energy in the form of electricity.

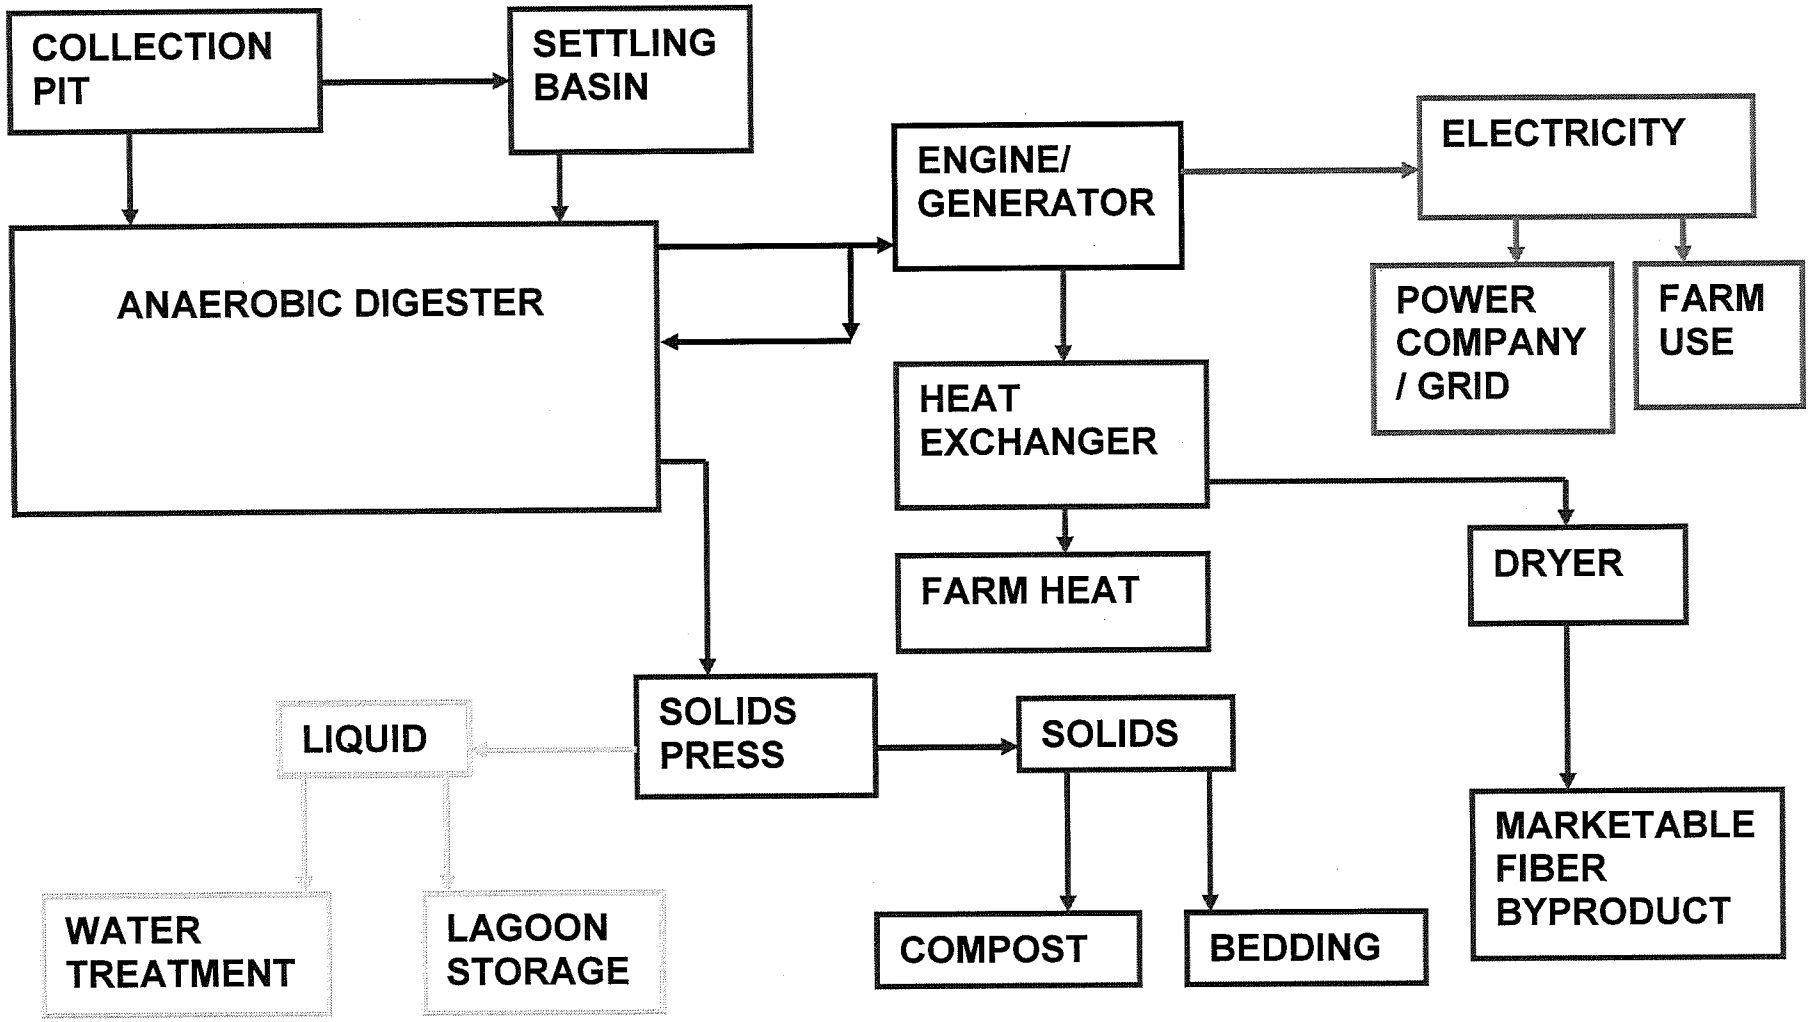
GHD, Inc. ENVIRONMENTAL SERVICES

3. BASIC ANAEROBIC SYSTEM FLOW CHART



4. APPLICABLE REQUIREMENTS

Federal Requirements:

This section describes the regulatory analysis of the applicable air quality rules with respect to this PTC.

IDAPA 58/.01.01.201 .....Permit to Construct Required

The proposed project does not meet the permit to construct exemption criteria contained in Sections 220 through 224 of the Rules. Therefore, a PTC is required.

IDAPA 58.01.01.203 .....Permit Requirements for New and Modified Stationary Sources

The application has shown to the satisfaction of DEQ that the facility will comply with all applicable emissions standards, ambient air quality standards, and toxic increments.

IDAPA 58.01.01.210 .....Demonstration of Preconstruction Compliance with Toxic Standards

The application has demonstrated preconstruction compliance for all TAPs identified in the permit application

NSPS & NESHAP The permittee has not proposed to construct or install any equipment that is defined as an affected emissions unit by either NSPS or NESHAP regulations.

The proposed rule found in the Federal Register: Environmental Protection Agency, 40CFR Parts 60, 63, et. al. Standards of Performance for Stationary Spark Ignition Internal Combustion Engines and National Emission Standards for Hazardous Air Pollutants for Reciprocating Internal Combustion Engines; Proposed Rule, does mention in Table 3 on page 33809 Landfill/Digester Gas engines > 500HP must meet the emission standards of 2.0 gr/HP-hr for NO_X, 5.0 gr/HP-hr for CO, and 1.0 gr/HP-hr for NMHC. The engines used in this permit to construct meet these emission standards.

5. POTENTIAL EMISSION ESTIMATES

Pollutant	PTE (lbs/hour)	PTE (tons/year)

The facility is classified by the Standard Industrial Classification # 1629 for Heavy Construction Not Elsewhere Classified.

NAICS: 237130
The facility is classified by the North American Industry Classification System # 237130 for Alternative Energy Structure Construction.

7. SCALED PLOT PLAN

8. AMBIENT IMPACT ANALYSIS

The air modeling, which was performed by Kleinfelder West Inc., was conducted consistent with the Idaho Department of Environmental Quality Dispersion Modeling Guidelines. The Ambient Air Quality Modeling Protocol for this project was submitted to IDEQ was approved October 29, 2007 and is attached at Appendix 2. The report presents the modeled results of the ambient air impacts from the proposed source emissions. The modeled impacts from criteria pollutants are compared to National Ambient Air Quality Standards (NAAQS). The modeled impacts from TAPs are compared to State of Idaho AACs. The full report can be found as attached as Appendix 1.

Appendix 3

Affidavit of Publication

STATE OF IDAHO)
COUNTY OF TWIN FALLS) SS.

Janet Cranney
I, ~~Ruby Aufderheide~~, being first duly sworn upon oath, depose and say that I am Legal Clerk of the TIMES-NEWS,published daily at, Twins Falls, Idaho, and do solemnly swear that a copy of the notice of advertisement, as per clipping attached, was published in the regular and entire issue of said newspaper, and not in any supplement thereof, for one ~~consecutive~~ publication, commencing with the issue dated 27th day of November, 2007 and ending with the issue dated 27th day of November, 2007

And I do further certify that said newspaper is a consolidation, effective February 16, 1942, of the Idaho Evening Times, published theretofore daily except Sunday, and the Twin Falls News, published theretofore daily except Monday, both of which newspapers prior to consolidation had been published under said names in said city and county continuously and uninterruptedly during a period of more than twelve consecutive months, and said TIMES-NEWS, since such consolidation, has been published as a daily newspaper except Saturday, until July 31, 1978, at which time said newspaper began daily publication under said name in said city and county continuously and uninterrupted.

And I further certify that pursuant to Section 60-108 Idaho Code, Thursday of each week has been designated as the day on which legal notice by law or by order of any court of competent jurisdiction within the state of Idaho to be issued thereof Thursday is announced as the day on which said legal will be published.

STATE OF IDAHO
COUNTY OF TWIN FALLS

On this 27th day of November, 2007, before me,

a Notary Public, personally appeared Janet Cranney,
known or identified to me to be the person whose name subscribed to the within instrument, and being by me first duly sworn, declared that the statements therein are true, and acknowledged to me that he executed the same.

Linda Capps McGuire
Notary Public for Idaho
Residing at Twin Falls, Idaho.

My commision expires: 5-19-09

LINDA CAPPS-McGUIRE
NOTARY PUBLIC
STATE OF IDAHO

PUBLIC NOTICE

Andgar Corporation has applied for an air quality permit to construct for an anaerobic digester located at the West one-half of Section 34, Township 11 South, Range 19 East, B.M. Hansen, Idaho. An informational meeting will be held at Hansen Community Center, 340 Main St. Hansen, ID, at 5:00 pm on December 11, 2007.

PUBLISH: November 27, 2007

APPENDIX 4
Emission Calculations

Emissions Unit	PM_{10}		NO_x		CO		VOC	
	lb/hr	T/yr	lb/hr	T/yr	lb/hr	T/yr	lb/hr	T/yr
Engine No. 1	7.0E-02	3.03E-01	2.33	10.2	5.12	22.46	2.33	10.2
Engine No. 2	7.0E-02	3.03E-01	2.33	10.2	5.12	22.46	2.33	10.2
Engine No. 3	7.0E-02	3.03E-01	2.33	10.2	5.12	22.46	2.33	10.2
Total		9.1E-01		30.6		67.38		30.6

Engine No. 1-3: $\frac{6{,}512\ \text{btu}}{\text{bhp-hour}}$ *1,057bhp = $\frac{6.89\text{MMBtu}}{\text{hr}}$

PM_{10}
Based on AP-42 3.2 "Natural Gas-fired Reciprocating Engine" filterable emission factor of 7.71E-05 lb of PM_{10} & $PM_{2.5}$ /MMBtu Produced for 4-Stroke Lean-burn Engines.

Engine No. 1-3: $\frac{6.89\text{MMBtu}}{\text{hr}} * \frac{.010\ \text{lbs}}{\text{MMBtu}} = \frac{.069\text{lbs}}{\text{hr}} * \frac{8{,}760\ \text{hrs}}{\text{yr}} * \frac{\text{Ton}}{2000\ \text{lbs}} = \frac{.30\text{T}}{\text{yr}}$

NO_x
Based on engine manufacturer data on the combustion of digester gas.

Engine No. 1-3: $\frac{1\ \text{gram}}{\text{bhp-hr}}$ * 1,057bhp = $\frac{1{,}057\ \text{grams}}{\text{hr}} * \frac{\text{lb}}{454\ \text{grams}} = \frac{2.33\ \text{lbs}}{\text{hr}}$ and $\frac{10.2\text{T}}{\text{yr}}$

CO
Based on engine manufacturer data on the combustion of digester gas.

Engine No. 1-3: $\frac{2.2\ \text{grams}}{\text{bhp-hr}}$ * 1,057bhp = $\frac{2{,}325\ \text{grams}}{\text{hr}} * \frac{\text{lb}}{454\ \text{grams}} = \frac{5.12\ \text{lbs}}{\text{hr}}$ and $\frac{22.46\text{T}}{\text{yr}}$

VOC
Based on NMHC from engine manufacturer data on the combustion of digester gas.

Engine No. 1-3: $\frac{1\ \text{gram}}{\text{bhp-hr}}$ * 1,057bhp = $\frac{1{,}057\ \text{grams}}{\text{hr}} * \frac{\text{lb}}{454\ \text{grams}} = \frac{2.33\ \text{lbs}}{\text{hr}}$ and $\frac{10.2\text{lbs}}{\text{yr}}$

H_2S Conversion from ppm to lb/hr

$$\frac{2000ft^3\ H_2S\ (v)}{1.0E^{+06}\ ft^3\ (v)} = \frac{x}{10.0scf/s};\ x = \frac{0.02\ scfH_2S\ /\ s}{379\ scf\ Gas\ /\ lb\text{-}mole} = \frac{5.0E^{-05}lbH_2S\text{-}mole}{s} * 34.08moleH_2S = \frac{1.7E^{-03}lbH2S}{s} * \frac{3600s}{hr} = \frac{6.2lbH_2}{hr}$$

1) 2000ppm H_2S applicant estimate based on a previously constructed facility.
2) 379 scf Gas/lb-mole is a Natural Gas industry constant.
3) 34.08 is the molecular weight of H_2S.
4) Maximum pound per your emission rate with 864,000 scf/day (10.0 scf/s) of biogas.

H_2S Conversion from H_2S to SO_2

$$\frac{6.2lbH_2S}{hr} * \frac{32}{34} = \frac{5.8lb\ S}{hr}$$

$$\frac{5.8lb\ S}{32} = .18lb\ mole\ S$$

$$.18\ lb\ mole\ SO2 * 64 = \frac{11.3lb\ SO2 \quad or \quad 49.3\ tons}{Hr \qquad\qquad yr}$$

1) 34 is the molecular weight of H_2S
2) 32 is the molecular weight of Sulfur
3) Assumes 100% H2S conversion for SO2
